

Vocabulary I understand and can use these words:

<u>Digital literacy</u>	<u>Information technology</u>		<u>Computer science</u>	
input device	document	bold	debug	instructions
output device	format	centre	program	prediction
unacceptable	text box	italics	action	icons
acceptable	tools		code	output
app	underline		swipe	input
digital footprint	bullet points		button	
websites	font		algorithm	
search engine	align		direction	
consent				
Online bullying				

Skills

I can:

Login to a laptop or computer with a partner	Create a text box and write sentences	Make predictions about what I think will happen
use simple words in search engines (managing online information)	Format text using a range of formatting tools including alignment tools and bullet points	Write code to make an onscreen object move using the keyboard
Find information online on a website given to me by my teacher	Insert a picture into a document and format it so it can be moved	Spot mistakes in programs
	Save my work with a partner	Use different inputs (mouse and onscreen buttons)
	Take videos and photos using a camera or tablet	

I could create my own game using the skills I have learnt using free code and use my knowledge to teach my peers

Knowledge I know:

Other people may look or act differently online (self image)	What online bullying is, how it can make people feel and how they can get help (online bullying)	Content on the Internet may belong to other people (copyright and ownership)
How it might make someone feel if I share something without their permission (online relationships)	That information I find online may not be real and explain the differences (managing online information)	What input and output devices are (mouse, screen, keyboard, camera, speaker, TV, monitor)
People may use technology to communicate with strangers and the risks (online relationships)	What voice activated searching is and that it is not a real person (managing online information)	What a digital footprint is
Who I can talk to if something happens online without my consent (online reputation)	Technology rules may be used to help anyone accessing online technology (health, wellbeing and lifestyle)	Content on the Internet may belong to other people (copyright and ownership)
Who I should ask before sharing online (online reputation)	What private means and some rules for keeping information private (privacy and security)	What input and output devices are (mouse, screen, keyboard, camera, speaker, TV, monitor)
